

Drug Prior Authorization

Like many insurance plans, Dean Health Plan follows a drug formulary that lists prescription drugs covered for our members. Each of these medications has been reviewed by the Pharmacy and Therapeutics Committee to ensure you receive the most safe and effective treatment at a reasonable cost.

Drug Formularies

Visit deancare.com/drugformulary to see the published lists of Dean Health Plan's drug formularies. These formularies are in PDF form and are searchable electronically by hitting CTRL+F. Drugs are listed by generic name, followed by brand name (generic = small letters; BRAND = BIG LETTERS)

If an excluded drug has been prescribed for you, please ask your physician or pharmacist to recommend an alternative medication that would be covered. Please note some members may currently have coverage for a non-formulary drug due either to an exception in their pharmacy benefit, or because they have an approved authorization from Dean Health Plan.

Drugs Requiring Prior Authorization

Certain medications require prior authorization by Dean Health Plan. The drug prior authorization process can be initiated by a qualified practitioner who should fax a Drug Prior Authorization Request Form to **855-668-8551**. Forms are available at deancare.com/providers/pharmacy-services. A copy of the request, including the determination, will be mailed to the member and the requesting practitioner. Note: Drugs that require prior authorization are marked within the formulary.

Member Portal

Visit deancare.com/login and use your member number located on your ID card to activate your account. Access the pharmacy portal through your Member Portal to review additional details of their formulary.
